

# INDIAN COUNCIL OF FORESTRY RESEARCH & EDUCATION

## Foreword

It gives me great pleasure to present Citizen Charter to all our stakeholders. Preparation of this Charter is a sincere endeavour by us towards fulfilling our commitment of providing an efficient, useful and responsive forestry research input. The success of this Charter will depend greatly on the proactive response that it receives from the stakeholders for deriving the assured level of success.

We need and look forward to your co-operation for success of our effort.

**(Dr Ashwani Kumar)**  
Director General  
ICFRE

2013-2014

## **1. INTRODUCTION**

Indian Council of Forestry Research and Education (ICFRE), an apex body in the national forestry research system, has been undertaking the holistic development of forestry research through need based planning, promoting, conducting and coordinating research, education and extension covering all aspects of forestry. The Council deals with the solution based forestry research in tune with the emerging issues in the sector, including global concerns such as climate change, conservation of biological diversity, combating desertification and sustainable management and development of resources. Topical research by the Council enhances public confidence in the ability of forest managers and researchers to successfully handle challenges related to natural resource management. The ICFRE is an ISO 9001:2000 certified organization.

## **2. VISION**

To generate, preserve, disseminate and advance knowledge, technologies and solutions for addressing the issues related to forests and promote linkages arising out of interactions between people, forests and environment on a sustained basis through research, education and extension.

## **3. MISSION**

1. Updating, developing and providing knowledge, skill, technology and experiences to support development in forestry sector in accordance with priorities of National Forestry Research Plan (NFRP) and National Forest Policy for sustainable forest development.
2. ICFRE as model organization to undertake, coordinate, promote and aid forestry research, extension and education.
3. Developing packages of technology and practices according to the needs of different stakeholders so as to contribute towards sustainability and promote these technologies through aggressive marketing.
4. Focusing research efforts on priorities as identified in NFRP and attaining global leadership in few emerging strategic areas.
5. Optimizing the use of research resources e.g. financial, human and infrastructure through establishing and nurturing symbiotic networking with ICFRE providing a core of such network at national and regional level.

#### **4. OBJECTIVES**

1. To undertake, aid, promote and co-ordinate forestry research, education and its application.
2. To extend the research findings from lab to land
3. To develop & maintain a National Forest Library & Information Centre.
4. To provide consultancy services in the field of forestry research, education and training, and in allied sciences.

#### **5. FUNCTION**

1. To undertake, aid, promote and coordinate forestry education, research and applications thereof.
2. To develop and maintain a National Library and Information Centre for forestry and allied sciences
3. To act as a clearing-house for research and general information related to forests and wildlife
4. To develop forestry extension programmes and propagate the same through mass media, audiovisual aids and extension machinery
5. To provide consultancy services in the field of forestry research, education and allied sciences
6. To undertake other jobs considered necessary to attain these objective

#### **6. SERVICES**

- Planting stock improvement programme of different species.
- Conservation of natural forests and bio-diversity and eco-restoration of ecologically fragile and disturbed areas.
- Development and extension of Social forestry/Agro-forestry models.
- Utilization of non-conventional woods and weeds for manufacture of forest products.
- Developing the technology for reclamation of wastelands.
- Geological, geomorphological and micro-morphological studies on skeletal and sodic soils.
- Development of technology for eco-friendly preservatives
- Technology development and research on forest based livelihood.
